Office Action Summary

Application No.

10/772,476

Applicant(s)

BROWN ET AL.

Examiner

MICHAEL C. LAI

Art Unit

2457

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 December 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1.5-14, 23, 27-36, 45 and 46 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1.5-14, 23, 27-36, 45 and 46 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB08)
Paper No(s)/Mail Date 12/18/2008.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

This office action is responsive to amendment filed on 12/18/2008.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/03/2008 has been entered.

Response to Amendment

The examiner has acknowledged the amended claims 1, 23, 30, and 45. Claims 1, 5-14, 23, 27-36, and 45-46 are pending.

Response to Arguments

Applicant's arguments with respect to claims 1, 5-14, 23, 27-36, and 45-46 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 6, 23, 28, and 45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 23, and 45, the phrase "a particular one" renders the claims indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim 6 recites the limitation "the proxy" in line 1. It is not clear whether it is referring to "a proxy" in claim 5 or claim 1.

Claim 28 recites the limitation "the proxy" in line 1. It is not clear whether it is referring to "a proxy" in claim 27 or claim 23.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 5-14, 23, 27-36, and 45-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kasai et al. (US 7,216,072 B2, hereinafter Kasai).

Regarding claim 1, Kasai discloses a method of converting an initial message residing in a mobile computer device capable of wireless access [FIG. 17 and col. 11, lines 22-25, handheld terminal or cellular phone] to a computer network into a processed message, the method comprising:

presenting a menu option to a user of the device for converting the initial message into the processed message, wherein program instructions for presenting the menu option originate in the mobile computer device [FIG. 3, col. 5, lines 63-66; FIG. 17 and col. 21, lines 22-26];

after the user selects the menu option to convert, wirelessly sending text in the initial message to at least one server on the computer network for converting the text in the initial message into the processed message [col. 21, lines 33-49, "Further, the translated mail server 32 sends the text information to the translation server 33 and requests the server 33 to translate it"];

wherein the at least one server comprises a proxy and a processing server [FIG. 17, col. 21, lines 42-49. Note that the translated mail server (32) and the translation server (33) forming part of the server system (1) in Kasai's reference are equivalent to the proxy (22) and the processing server (24) in the claim];

wherein the text in the initial message is sent first to the proxy for conversion from a text format into a new format compatible with the processing server before sending the initial message in the new format to the processing server, and then to the processing server [FIG. 17, col. 21, lines 42-49; Note that the proxy server (32) actually does some sort of format conversion for the translation server (33) when extracting text from an email];
and

the mobile computer device receiving a representation of the processed message from a particular one of the at least one server [col. 21, lines 54-56].

Kasai discloses all limitations of claim 1, except the new format being hypertext markup language. However, it is known to a person skilled in the art that emails can be sent in several formats including HTML. And because of the high versatility of HTML, a person skilled in the art would certainly consider this language to solve the problem of translation of emails using different formats in Kasai's fourth embodiment. Thus, it would have been obvious to a person with ordinary skill in the art at the time the invention was made to convert from a text format into HTML before sending the message to the processing server as a choice of options, thereby solving the problem of translation of emails using different formats.

Regarding claim 5, Kasai discloses the method of claim 1, wherein, in the step of receiving, the representation of the processed message is received by the mobile computer device via a proxy in the computer network [Kasai, FIG. 1].

Regarding claim 6, Kasai discloses the method of claim 5, wherein the proxy converts the processed message into a device-formatted representation of the processed message before sending to the mobile computer device [Kasai, col. 6, lines 6-9, the WWW server uses HTML implying the proxy converts the message into a device-formatted message before sending it to the mobile device].

Regarding claim 7, Kasai discloses the method of claim 1, wherein the menu option is a translation option, an encryption option, a spell check option or a thesaurus option [Kasai, FIG. 3 and col. 7, lines 17-21, translation option].

Regarding claim 8, Kasai discloses the method of claim 1, wherein the text in the initial message comprises text displayed on the mobile computer device in a first language [Kasai, FIG. 3].

Regarding claim 9, Kasai discloses the method of claim 8, wherein the text forms part of an email [Kasai, FIG. 9 and col. 14, lines 19-34].

Regarding claim 10, Kasai discloses the method of claim 8, wherein the text is in a Web page [Kasai, FIG. 1, browser on the device and the WWW server uses HTML].

Regarding claim 11, Kasai discloses the method of claim 8, wherein the menu option is a translation option, such that when the translation option is selected, a pop-up is displayed prompting a user of the mobile computer device to choose at least one translation characteristic option [Kasai, FIG. 3 and col. 6-7, lines 59-26].

Regarding claim 12, Kasai discloses the method of claim 11, wherein the pop-up prompts the user to identify the first language [Kasai, FIG. 3 and col. 6-7, lines 59-26].

Regarding claim 13, Kasai discloses the method of claim 11, wherein the pop-up prompts the user to choose a second language into which the text is to be translated [Kasai, FIG. 3 and col. 7, lines 22-26].

Regarding claim 14, Kasai discloses the method of claim 1, but silent about further comprising, before the step of presenting, automatically checking to determine whether the initial message corresponds to text in a language that is not native to a user of the mobile computer device. Official Notice is taken for checking the initial message to see if the text is in a language that is not native to the user, as this is essential for determining if a translation is needed. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to do so for the purpose of avoiding unnecessary operation by determining if a translation is needed before presenting the menu to the user, thereby providing a more efficient translation system.

Claims 23, 27-36 are of the same scope as claims 1, 5-14. They are rejected for the same reason as for claims 1, 5-14 respectively.

Claim 45 is of the same scope as claim 1. It is rejected for the same reason as for claim 1.

Regarding claim 46, Kasai discloses the computer-readable medium of claim 45, wherein the initial message is in a first language, and the processed message is in a translated language [Kasai, col. 6, lines 2-5, request/response messages].

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is reminded that in amending in response to a rejection of claims, the patentable novelty must be clearly shown in view of the

state of the art disclosed by the references cited and the objection made.

Applicant must show how the amendments avoid such references and objections. See 37 CFR 1.111(c).

6. Hokao, US 6,907,256 B2, has taught a mobile terminal with an automatic translation function.
7. Hayashi Hiroto, JP 2001 251429 A, has taught a mobile voice translation system.
8. Fish, WO 02/23389 A1, has taught systems and methods for translating information.

Examiner's Note: Examiner has cited particular columns and line numbers in the references applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

In the case of amending the claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Lai whose telephone number is (571) 270-3236. The examiner can normally be reached on M-F 8:30 - 5:00 EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
